

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

LAM ZyFin Global Markets UCITS ETF Plc - LAM Alternatif ZyFin Turkey Sovereign Bond UCITS ETF - Class USD

(ISIN: IE00BYVJW411) LAM Alternatif ZyFin Turkey Sovereign Bond UCITS ETF (the 'Fund') is a Sub-Fund of LAM ZyFin Global Markets UCITS ETF Plc (the 'Company').

Lemanik Asset Management S.A., Dublin Branch is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The objective of the Fund is to track the performance of the ZyFin Turkey Sovereign Bond Laddered Index ('the Index') which consists of a basket of sovereign bonds issued by the Government of Turkey, in Turkish Lira (TRY), across various maturities ('the Index Securities').
- In order to achieve this investment objective, the Investment Manager will aim to invest in a portfolio of securities that as far as possible and practicable, consist of the Index Securities directly in a primary bond auction held by the Government of Turkey (where such bonds are to be listed immediately thereafter) or on the secondary markets. The Fund shall use a passive or index replicating approach.
- The Index is comprised of six bonds issued by the Government of Turkey, which are selected from a universe of all bonds issued by them and which have greater than 100m TRY outstanding amount. The bonds are divided into three baskets, with each basket containing two bonds and having a residual maturity closest to a target maturity of 2 years, 5 years and 10 years respectively. Index Securities are issued with fixed- rates, and the Index is calculated, in USD.
- The securities in which the Fund invests will be listed or traded on Recognised Markets in Turkey in accordance with the limits set out in the UCITS Regulations. The Fund may hold ancillary liquid assets such as overnight deposits, in accordance with the UCITS Regulations and if permitted by the prevailing local regulations.
- The Sub-Fund will use the replication strategy in order to seek to track as closely as possible the returns of the Index after deduction of fees and expenses. However, while it is the Investment Manager's intention that any coupon received from Index Securities be reinvested on the dates on which they are received, this will only be possible where such coupon amounts are equal to or exceed the minimum investment amount which may be required in order to invest in Index Securities, as determined by the issuers of such securities and general market practice. Pending such investments, the coupon amount may be held in cash, which may result in tracking error. Such minimum investment amounts may also change over time, depending upon changes in the prices of the constituents of the Index from time to time.
- If full replication of the Index is not reasonably possible (for example as a result of the illiquidity or unavailability of certain Index Securities), in order to minimise tracking error, the Fund may, in the first instance, purchase those Turkish Government bonds which in the opinion of the Investment Manager are closely equivalent to the relevant Index Securities in terms of maturity, in order to build a representative portfolio that provides a return similar to the Index.
- Save in exceptional circumstances, the Fund will generally only issue and redeem to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.
- Purchase and sale of shares in the Fund:
 - Primary Market: Twice a week.
 - Secondary Market: Daily.
- The Share Class does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of your shares.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward indicator:

- Tracking Error Risk - the risk that the Fund performance does not track the performance of the Index. While the Fund seeks to track the performance of its respective benchmark Index, whether through a replication or optimizing strategy, there is no guarantee that they will achieve perfect tracking and the Fund may potentially be subject to tracking error risk.

- As the Fund will invest substantially all of its assets in issuers located in Turkey, its performance could be more volatile than that of more geographically diversified funds owing to market, currency, regulatory conditions and developments in Turkey.
- The investments of the Fund are exposed to Turkey which, due to Turkey being an emerging market, may result in greater risk of loss than investments in developed markets. Several factors such as geo-political, social and economic instability have higher potential risk factors. Since Turkey is geographically surrounded by war inflicted areas, it is exposed to the possibility of war, frequent acts of terrorism, major political instability, hostile relations with neighbouring countries, such circumstances expose Turkey to greater geo-political risks as compared to other markets. Further, limited securities market, market volatility due to uncertain political events, etc. may have adverse effects on the Fund's returns.
- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- Since the Fund and the underlying Index do not hedge the currency risk, any depreciation of TRY against USD will negatively impact the Fund returns in USD.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Information'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

As the share class has not had a full year of performance, the ongoing charges figure is an estimated figure.

The on-going charges figure may vary from year to year. It excludes:

- Performance Fees.
- Underlying market access cost and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information on charges, please see the 'Fees and Expenses' section of the Prospectus.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.89%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

Past Performance

Please note there is not a complete calendar year of performance available for this share class.

The Fund will be launched upon initial subscription.
